

TECHNOLOGY EDUCATION

Background

The District believes the use of technology provides opportunity to enhance learning for all students. The District endorses the use of technology to support teaching and learning so as to improve achievement of student outcomes.

A recognition of diverse student learning styles and the need to develop technology literacy dictates the establishment and ongoing development of technology education.

Procedures

1. Each year the Superintendent or designate shall establish a consultative process to review the District Three-Year Technology Plan so as to:
 - 1.1 Establish evaluations to measure achievement of goals.
 - 1.2 Review District technology goals and priorities.
 - 1.3 Develop and implement strategies to achieve goals.
2. Support services will be available to assist with ongoing implementation of technology education.
3. The District's Leadership Framework will include activities to ensure development of technology education.
4. Results of the implementation of the Three-Year Technology Plan shall be reported on or before June 30 of each year.
